

QGIS Application - Bug report #22133

form not loaded properly from qml file

2019-05-23 05:22 PM - Robin Rotsaert

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	Forms	
Affected QGIS version:	3.6.2	Regression?: No
Operating System:	windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29944
Description		
<p>when saving the form-information from one geopackage-layer as a qml-file and trying to load it to another geopackage-layer (both have some entirely equal columns) only the "general" form setup is loaded. The widget type isn't, the defaults neither (haven't checked on the constraints).</p>
