

## QGIS Application - Bug report #2247

### Aborting fetching plugin repos

2009-12-10 02:30 AM - Maxim Dubinin

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	Borys Jurgiel	
<b>Category:</b>	Python plugins	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>	All	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 12307
<b>Description</b>		
<p>If you click "abort fetching" while fetching repositories you'll have to click Ok as many times as how many unfetched repos left.</p> <p>I guess we need "Abort All" button and "Abort fetching" should be "Abort current".</p>

- Resolution set to fixed
- Status changed from Open to Closed

Fixed in commit:4099c4aa (SVN r12622) / Installer 1.0.8. Now you can use Shift key when pressing the 'abort fetching' button to do it quietly. Also, if you forget, you can still do it in one of the warning dialogs to cancel all the remaining ones. I hope it's enough, otherwise reopen please.

(todo: describe it in the context help and the user guide)

| Also, if you forget, you can still do it in one of the warning dialogs to cancel all the remaining ones.

I was looking for something like "cancel all" button on the warning dialog, but can't see anything like that. Can you please explain what did you mean?

Use the Shift modifier.

**#4 - 2009-12-27 11:30 AM - Maxim Dubinin**

Ah, Shift works. But I still think it would be more straightforward (especially for a newbie) to have "Cancel all" on the first warning message. But no big deal! Thanks for working on that.

**#5 - 2009-12-27 02:33 PM - Borys Jurgiel**

I'm not sure if it's really good for newbies to put so many buttons... Instead, I'll make only one message box with a list of all the affected repos when the gui freeze is over.
