

QGIS Application - Bug report #2272

print composer load vrom template - qpt don`t work correct

2009-12-11 02:49 PM - Gerhard Spieles

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:		
Affected QGIS version:		Regression?: No
Operating System: Windows		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 12332
Description		
<p>I saved 3 qpt templates for different prints in one Project in the projectfolder.</p> <p>Opening the printcomposer, it seems, that the content of more then one template automatical is load.</p> <p>When I load a sprecified template, the print composer shows the objects from the former content also.</p>

Would you mind give a try to the composer in the developer version of qgis (you can install it trough the osgeo4w installer, is labelled "qgis-dev")? There were major updates in the composer since 1.3: the new composer has a different way to manage multiple layouts. Please leave further feedback, thanks.

Hello,

have installed ver. 1.40 r12504M under winXP with OSGEO4W and the composer works verry good with different layouts.

Thank you

Gerhard
