

QGIS Application - Feature request #228

[SVN] Set svn:ignore property on the repository files

2006-08-06 04:47 PM - Mateusz Loskot -

Status:	Closed	
Priority:	Low	
Assignee:	Gary Sherman	
Category:	Build/Install	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 10287
Description		
<p>I'd like to ask for setting svn:ignore property on the non-versioned files and folders in the QGIS repository.</p> <p>Here is my list of most important objects that I think should be excluded:</p> <p>.deps .libs Makefile Makefile.in *moc.cpp ui_*.h</p> <p>Here is explanation: How to set svn:ignore property</p>		

History

#1 - 2006-08-06 04:49 PM - Mateusz Loskot -

Additional patterns to be ignored:

*.qrc.cpp
*.loT
Makefile.win.rules
stamp-h.in
qgis_api

Simply, it would be good to exclude all generated, intermediate and non-versioned files.

#2 - 2006-08-10 04:24 AM - Gavin Macaulay -

- Resolution set to fixed
- Status changed from Open to Closed
