

QGIS Application - Feature request #2394

Listing the layer retrieving extent

2010-01-25 01:46 PM - aperi2007 -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GUI	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 12454
Description		
<p>When adding many postgis layers , if they are large QGis retrieve the extent for every single layer. Every retrieve of extend can require even many time, so will be useful give a label with the actually layer in extend retrieving. This to avoid the user will think the qgis il locked. Actually the only solution is query the pg_stat_activity view of postgres to know what layer is retrieving.</p>		

History

#1 - 2010-03-10 04:03 PM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

fixed in commit:4852ceb1 (SVN r13045). See also #2460.
