<b>Description</b>		
<p>Running a georeferencer with the Helmert transform causes a crash:</p> <p>/usr/bin/qgis.bin: symbol lookup error: /usr/lib/libgsl.so.0: undefined symbol: cblas_dtrsv</p> <p>I <b>think</b> its because libgslcblas isn't linked in anymore - I did find some changesets where it was removed.</p> <p>This is on an Ubuntu Karmic box, with Qgis from the ppa.launchpad.net source.</p>
