

QGIS Application - Bug report #2423

spatialite: deleting columns is not allowed

2010-02-09 07:38 AM - Giovanni Manghi

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Data Provider	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 12483
Description		
<p>Is the spatialite provider supposed to allow deleting columns in the table of attributes? If yes then in QGIS (tested with trunk) this is not possible. If the answer is no, then please forgive me and close the ticket.</p> <p>cheers</p>

Sorry, deleting a column isn't allowed at all in SQLite.

You can add columns to any table after initial CREATE: but changing an already defined column is forbidden anyway.

Accordingly to this, renaming (or deleting) a column is not possible in SQLite/Spatialite.

Bye Sandro
