

QGIS Application - Bug report #2425

page setup problems MacOS

2010-02-09 10:12 AM - vrgsmm01 -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:		
Affected QGIS version:		Regression?: No
Operating System: OS X		Easy fix?: No
Pull Request or Patch supplied:		Resolution: duplicate
Crashes QGIS or corrupts data:		Copied to github as #: 12485
Description		
<p>When you try to print from the composer...if the layout paper is bigger than A4 ...print result is out of range.</p> <p>This problem can be fixed by adding an additional menu item "page setup" in macos version otherwise can't print layouts in plotter...because page setup doesn't work properly.</p> <p>In version 0.74 the page setup is working perfectly...because if the composer map paper is different from the printing paper...the "page setup dialog" is appearing asking you to choose the appropriate page and printer for printing!</p> <p>Now...in current version 1.4 this feature is not present...why???</p>
