

QGIS Application - Bug report #2430

Random points ftools issue

2010-02-10 08:00 PM - dr -

Status: Closed	
Priority: Low	
Assignee: cfarmer -	
Category: Python plugins	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 12490
Description	
1. Open shapefile: 2. Try to put two random points with Random points tool;] At result I get an error: An error has occurred while executing Python code: Traceback (most recent call last): File "C:\\OSGeo4W\\apps\\qgis-dev\\python\\plugins\\fTools\\tools\\doRandPoints.py", line 123, in accept self.randomize(inLayer, outPath, minimum, design, value, self.progressBar) File "C:\\OSGeo4W\\apps\\qgis-dev\\python\\plugins\\fTools\\tools\\doRandPoints.py", line 209, in randomize else: bound = self.createSinglePolygon(inLayer, progressBar) File "C:\\OSGeo4W\\apps\\qgis-dev\\python\\plugins\\fTools\\tools\\doRandPoints.py", line 155, in createSinglePolygon geom = geom.combine(QgsGeometry(feat.geometry())) [[AttributeError]]: 'NoneType' object has no attribute 'combine' Python version: 2.5.2 (r252:60911, Feb 21 2008, 13:11:45) [MSC v.1310 32 bit (Intel)]

History

#1 - 2010-02-11 12:09 AM - Giovanni Manghi

I tested both under windows (xp) and linux and got no python errors, but the tool is way too slow: I waited something like 10 minutes just to see the

progress bar arrive at 41% and then become apparently stuck.

#2 - 2010-02-11 09:32 AM - Maxim Dubinin

I confirm, mine stuck at 14% with 10 random points. No error though.

#3 - 2010-05-19 11:39 PM - Paolo Cavallini

Got a different error:

Traceback (most recent call last):

```
File "/usr/share/qgis/python/plugins/fTools/tools/doRandPoints.py", line
124, in accept
self.randomize(inLayer, outPath, minimum, design, value)
File "/usr/share/qgis/python/plugins/fTools/tools/doRandPoints.py", line
186, in randomize
else: points = self.loopThruPolygons(inLayer, value, design)
File "/usr/share/qgis/python/plugins/fTools/tools/doRandPoints.py", line
227, in loopThruPolygons
value = sAtMap[index].toInt()r0
[[UnboundLocalError]]: local variable 'index' referenced before assignment
```

Versione Python:

```
2.6.5 (commit:0f397015 (SVN r266):79063, Mar 18 2010, 23:59:47)
[GCC 4.4.3]
```

Strangely enough, this does not happen with some PC, for unknown reasons.

#4 - 2010-05-19 11:42 PM - Paolo Cavallini

See also #2495 (partial duplicate).

#5 - 2010-06-30 03:03 PM - Giuseppe Sucameli

Replying to [comment:3 pcav]:

Got a different error:

Traceback (most recent call last):

```
File "/usr/share/qgis/python/plugins/fTools/tools/doRandPoints.py", line
124, in accept
self.randomize(inLayer, outPath, minimum, design, value)
File "/usr/share/qgis/python/plugins/fTools/tools/doRandPoints.py", line
186, in randomize
else: points = self.loopThruPolygons(inLayer, value, design)
File "/usr/share/qgis/python/plugins/fTools/tools/doRandPoints.py", line
227, in loopThruPolygons
value = sAtMap[index].toInt()r0
[[UnboundLocalError]]: local variable 'index' referenced before assignment
```

Versione Python:

2.6.5 (commit:0f397015 (SVN r266):79063, Mar 18 2010, 23:59:47)

[GCC 4.4.3]

Strangely enough, this does not happen with some PC, for unknown reasons.

I've found the issue: the reason is the used language.

I'm writing a patch.

#6 - 2010-06-30 03:54 PM - cfarmer -

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:6f3384df (SVN r13861) and commit:9c2efef7 (SVN r13862)

Carson
