Pull Request or Patch supplied:			**Resolution:**	fixed
Easy fix?:	No		**Copied to github as #:**	12529

Description

There is no function in the main qgis interface to retrieve the advanced digitize toolbar from a plugin (in my case while developing in python).

In fact i identified that there is no member exposing this toolbar.

I am not a c++ developer, but I believe the following places (at least) must be changed, respectively other places. Whatsoever, it worked for me with this changes:

qgisinterface.h:

after line 190:
    virtual QToolBar *advancedDigitizeToolBar() = 0;

qgisappinterface.cpp:

after line 233:
QToolBar *QgisAppInterface::advancedDigitizeToolBar() { return qgis->advancedDigitizeToolBar(); }

qgisinterface.sip:

after line 144:
    virtual QToolBar *advancedDigitizeToolBar() = 0;

History

#1 - 2010-03-27 11:19 AM - Martin Dobias

- Resolution set to fixed

- Status changed from Open to Closed

added in commit:26f4b451 (SVN r13176)
