

QGIS Application - Bug report #2523

text/precision (minor) issue when creating a new vector layer

2010-03-07 10:40 AM - Giovanni Manghi

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Vectors	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 12583
Description		
click on the button "create new vector layer"		
add a new attribute of "decimal" type (select a precision)		
add another attribute, this time text/string data type		
in the attribute list the text attribute will be listed with a length and a precision, the latter obviously doesn't make any sense for this data type.		
tested on qgis trunk.
