

QGIS Application - Bug report #2549

Unable to define 4326 CRS for a shapefile with no prj

2010-03-12 02:21 PM - Maxim Dubinin

Status:	Closed	
Priority:	Low	
Assignee:	cfarmer -	
Category:	Python plugins	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: duplicate
Crashes QGIS or corrupts data:		Copied to github as #: 12609
Description		
I am getting this error using Define current projection instrument from Tools menu Identical output spatial reference system chosen while trying to assign 4326 CRS (+proj=longlat +ellps=WGS84 +datum=WGS84 +no_defs) to a layer, which does not have any prj. Other CRSes seem to work fine.
