

QGIS Application - Bug report #2555

QGIS show attribute table empty with postgres

2010-03-15 11:57 AM - aperi2007 -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Data Provider	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 12615
Description		
Using this code to create and fill a table on postgres: <pre>DROP TABLE IF EXISTS public.a_multilines; CREATE TABLE public.a_multilines (id serial PRIMARY KEY, codice VARCHAR, classe VARCHAR); SELECT [[AddGeometryColumn]]('public','a_multilines', 'geom', 3003, 'MULTILINESTRING', 2); DROP INDEX IF EXISTS public.idx_geom_gist_a_multilines; CREATE INDEX idx_geom_gist_a_multilines ON public.a_multilines using gist ("geom" gist_geometry_ops); DROP INDEX IF EXISTS public.idx_codice_a_multilines; CREATE INDEX idx_codice_a_multilines ON public.a_multilines(codice); DROP INDEX IF EXISTS public.idx_classe_a_multilines; CREATE INDEX idx_classe_a_multilines ON public.a_multilines(classe); insert into public.a_multilines (codice,classe,geom) values('pippo','pippo2',ST_GeomFromText('MULTILINESTRING',3003));</pre> Then QGIS (r13054) show the attribute table empty. Instead an identify on the line show the rights values.
