QGIS Application - Feature request #2582
Python plugin showPluginHelp function - another minor patch

2010-03-22 01:52 PM - Chris Crook

Status:	Closed		
Priority:	Low		
Assignee:	Borys Jurgiel		
Category:	Build/Install		
Pull Request or Patch supplied:		**Resolution:**	fixed
Easy fix?:	No	**Copied to github as #:**	12642

Description

This patch is just to restore the ultimate default helpfile name to be index.html (rather than index-en_us.html).

I think this is desirable, as index.html is the default html file displayed by many web site configurations, so I think that this is a good final fallback.

It is really just saying that in the absence of any specific translations, the fallback is whatever the original developer/documenter wrote, without making any assertion about what language that is or should be.
