

QGIS Application - Bug report #2591

QGIS uses wrong WMS version

2010-03-26 08:45 AM - joto -

Status:	Closed	
Priority:	Low	
Assignee:	Marco Hugentobler	
Category:	Web Services clients/WMS	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 12651
Description		
QGIS 1.4.0 sends no VERSION for WMS [[GetCapabilities]]. When it gets version 1.1.1 capabilities back, it still does the [[GetMap]] with VERSION=1.3.0. This breaks servers that don't work with 1.3.0.		

History

duplicate of #1984

#2 - 2010-03-26 08:51 AM - Jürgen Fischer

- Resolution deleted (duplicate)
- Status changed from Closed to Feedback

oops, not a duplicate after all. Do you have a public server where that happens?

#3 - 2010-03-26 09:05 AM - Jürgen Fischer

Not reproducible with neither 1.4 nor trunk.

#4 - 2010-03-26 09:21 AM - joto -

- Status changed from Feedback to Closed
- Resolution set to invalid

Sorry, my fault. QGIS isn't the problem. Mapserver is. It returns a WMS 1.3.0 [[GetCapabilities]]. I thought I configured it not to, but it seems that doesn't work.
