

QGIS Application - Feature request #2625

New Symbolology - SVGMarker oriented using a field attribute

2010-04-04 01:15 AM - aperi2007 -

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	nobody -	
<b>Category:</b>	Symbolology	
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed
<b>Easy fix?:</b>	No	<b>Copied to github as #:</b> 12685
<b>Description</b>		
<p>In New-Symbolology, when choose a svgmarker, would be useful to link the orientation (angle) of svgmarker to a field of the attribute table. Actually the orientation of svgmarker is setting but fixed.</p>		

History

#1 - 2010-06-12 12:28 AM - Martin Dobias

- Resolution set to fixed
- Status changed from Open to Closed

Data-defined rotation (and size) has been added for symbology-ng. (though currently only for single symbol renderer)
