<b>Description</b>  It would be quite useful to add a "Duplicate" button to the composer manager. This would simply make a copy of an existing composer item, possibly naming item 'xxx' as 'xxx copy'. This would be useful for making edits or changes based off of a current composer item without having to go through the process of creating a template, opening the template, etc.

Marco: Is the dropdown menu in the Composer Manager a placeholder for this option? Again, this would be a useful addition.
