Easy fix?:	No	**Copied to github as #:**	10325

Description

For easier printing and better layout, I would like to add some wishes:

*option to ungroup elements, group elements
This could be handy to change various things within the map to be printed. For example, I could select only one label and drag it to another position or change fontsize, fonttype, remove parts of the legend, ...

*rulers
Rulers or another possibility to align the features of a map would be great (or: an option within the menu to type in the x/y-position of an element.

*posibility to save settings
I guess this option is already foreseen.. Nevertheless, it would be great to have a possibility to store something like printing templates, where the position of the legend, header, scale is already defined. Composing maps would be much more faster.

History

#1 - 2009-01-14 11:50 AM - Marco Hugentobler

- Resolution set to fixed

- Status changed from Open to Closed

This is all done with the print composer enhancements.

#2 - 2009-08-22 01:01 AM - Anonymous
