With commit:65b1cc24 (SVN r13710) it is better. No error, but no result:

```
v.db.connect map=corine@PERMANENT =area =1 -p
```

layer table in database through driver with key

Vector map is connected by:

Successfully finished

From the shell, the same command gives:

```
v.db.connect map=corine@PERMANENT =area =1 -p
```

GRASS_INFO_MESSAGE(6106,1): Vector map <corine@PERMANENT> is connected by:

GRASS_INFO_END(6106,1)

layer <1> table <corine> in database </home/grass/Toscana_corso/PERMANENT/dbf/> through driver <dbf> with key <cat>

so the GRASS_INFO_END is apparently preventing the display of the relevant info.
