

QGIS Application - Feature request #2702

Ask user if WMS GetMap URL should be different than GetCapabilities URL

2010-05-10 09:35 AM - Jukka Rahkonen

Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 12762
Description In perfect world a well behaving WMS client should point <code>[[GetMap]]</code> requests to an URL that is announced by the well configured WMS server through the <code>[[GetCapabilities]]</code> document. However, in real life different <code>[[GetCapabilities]]</code> and <code>[[GetMap]]</code> URLs are often due to misconfigured server. Therefore it might be good if QGIS could give users two alternatives when this situation is detected. The question might be: "WMS server is advertising http://server.org/WMS/GetMap as <code>[[GetMap]]</code> URL. Would you like to use it?". If user answers No then <code>[[GetCapabilities]]</code> URL would be used also for <code>[[GetMap]]</code> .
