QGIS Application - Feature request #2719
add file manager

2010-05-14 07:21 PM - Paolo Cavallini

Status:	Closed			
Priority:	Low			
Assignee:	Martin Dobias			
Category:	Python plugins			
Pull Request or Patch supplied:	No		**Resolution:**	fixed
Easy fix?:	No		**Copied to github as #:**	12779

Description

It could be good to add, possibly as a plugin, a file manager, who will allow to delete and rename files even for formats that are composed of multiple files (e.g. shapefiles, tif+tfw)

History

#1 - 2010-05-14 11:42 PM - Alexander Bruy

I'm not sure, but some time ago Garry Sherman announce his [[GeoApt]] Data Browser (http://geoapt.com/geoapt-data-browser) and say that in future it will be integrated into QGIS.

Also there is a wxGIS project (http://code.google.com/p/wxgis/) which include wxCatalog - an [[ArcCatalog]]-like application. wxCatalog can manage formats that are composed from multiple files and support drag'n'drop in QGIS.

#2 - 2010-05-15 12:55 AM - Paolo Cavallini

An integrated solution would be far more attractive for most users

#3 - 2011-03-07 01:09 PM - Anne Ghisla

What about QGIS File Browser plugin? It lacks editing capabilites but it's a great improvement.

#4 - 2011-07-07 08:20 PM - Alister Hood

> *What about QGIS File Browser plugin?*

File management operations could be implemented in that and/or in the Qbrowser standalone app which comes with QGIS now.

#5 - 2011-08-23 01:41 AM - Borys Jurgiel

- Pull Request or Patch supplied set to No

- Status changed from Open to Closed

- Assignee changed from Borys Jurgiel to Martin Dobias

- Resolution set to fixed

I think we can close it now.
