Description

It would be useful to have tool for zoom to selected group, not only to layers of group.

Applied in where ? I don't see "Zoom to Layer" active when selecting a layer group with current master.

Did it ever work ? Can this ticket be reopened ? (I can't)

This applied by Martin about year ago. Just tested with latest master (d3860bf) and all works fine. Action called "Zoom to group"

I confirm right-click "zoom to group" works.

I guess I'm after a new feature, then, which is binding the functionality to the existing "zoom to layer" icon.

Should I file another ticket for that ? An enhancement one ?
