QGIS Application - Bug report #2821
compile under windows: MinGW missing?

2010-06-18 02:24 AM - fhof -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	Build/Install		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	wontfix
Crashes QGIS or corrupts data:		**Copied to github as #:**	12881

Description

I have trouble to compile QGIS from the sources.
I start by following the instructions of the INSTALL file, chapter "Building under windows using msys". It seems that the pre-built msys archive at OSGeo doesn't contain the [[MinGW]] folder required for the next steps.

BTW, I have noted a formating problem in chapter "An overview of the dependencies required for building". I'll propose a patch for it.

Thanks for all the job done for QGIS.

History

#1 - 2010-06-30 09:16 AM - Paolo Cavallini

Not quite sure whether [[MinGW]] compilation is still supported

#2 - 2010-09-19 07:33 AM - Paolo Cavallini

- Resolution set to wontfix

- Status changed from Open to Closed

I assume [[MinGW]] compilation is no longer supported. Reopen it if appropriate.
