QGIS Application - Bug report #2855
Bundled Qt translations

2010-07-01 02:11 AM - Volker Fröhlich

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	Build/Install		
Affected QGIS version:		**Regression?:**	No
Operating System:	All	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	12915

Description

Is there a need to bundle the Qt-translations?

I think so. Closing it for now, please reopen it if necessary.

#2 - 2010-09-19 02:44 PM - Volker Fröhlich

- Resolution deleted (invalid)

- Status changed from Closed to Feedback

It's not advisable to include Qt translations in applications. They also don't introduce a new language.

If the Qt translation has a problem, that should be mended upstream. The translation is also version-specific.

I simply deleted the Qt translations for the Fedora packages and couldn't witness any problem. I also don't think you need them for Windows, since they

should be part of the installed Qt-Package.
