QGIS Application - Bug report #2870
mapserverexportplugin: qgis segfault when plugin used with unsaved project

2010-07-06 12:21 PM - Richard Duivenvoorde

Status:	Closed			
Priority:	Low			
Assignee:	Borys Jurgiel			
Category:	Python plugins			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Debian	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	12930	

Description

Build Qgis Trunk on Ubuntu 9.10

When just opening a shp-file in qgis or a postgis layer, and immediatly open de mapserverexportdialog and try to export the project, qgis will first tell you that you should save the project. Doing that causes a qgis segfault on my machine.

Don't know what the best way to dive into this, but I tried to run qgis with strace to maybe have a clue. Last part attached, but I cannot see something in it.

History

#1 - 2010-10-23 01:25 AM - Paolo Cavallini

Duplicated in #2966

#2 - 2010-10-26 01:03 PM - Richard Duivenvoorde

- Resolution set to fixed

- Status changed from Open to Closed

fixed by code from Martin in commit:752bad8d (SVN r14435)

see mail thread: http://lists.osgeo.org/pipermail/qgis-developer/2010-October/011341.html
