QGIS Application - Feature request #2892
WFS http authentication support

2010-07-19 02:13 AM - Sandro Santilli

Status:	Closed			
Priority:	Low			
Assignee:	Marco Hugentobler			
Category:	Web Services clients/WMS			
Pull Request or Patch supplied:			**Resolution:**	fixed
Easy fix?:	No		**Copied to github as #:**	12952

Description

When a WFS server requires HTTP authentication, the current WFS plugin doesn't prompt the user for name/password but passes an empty string to the XML parser instead.

Would be nice to have a user/password prompt or at least a more meaningful error message to allow user to specify them as part of the url (user:pass@server)

the WFS provider should probably be ported to use QNetworkAccessManager instead of [[QgsHttpTransaction]] (like the WMS provider). That way the authentication would be handled transparently.

see also commit:7fb0e90c

#3 - 2010-07-29 06:38 AM - Marco Hugentobler

Hi Juergen

Thanks for the patch. I'm currently working on WFS-T support and will try to merge your patch with my changes and then commit everything together.

Marco

#4 - 2010-07-30 06:16 AM - Marco Hugentobler

- Resolution set to fixed

- Status changed from Open to Closed

Applied as part of commit:532cd103 (SVN r13986). Thanks, Juergen!
