

QGIS Application - Bug report #2902

QGIS crashes when using contour plug in

2010-07-22 04:11 PM - mskele -

Status:	Closed	
Priority:	Low	
Assignee:	Giuseppe Sucameli	
Category:	Python plugins	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 12962
Description		
<p>I'm running Enceladus on Windows 7 64 bit. I've imported a csv file successfully with <1000 points, but QGIS crashes when I try to run contours. Here's the error log:</p> <pre>qgis.exe 0.0.0.0 4b3b9758 ntdll.dll 6.1.7600.16559 4ba9b29c c0000005 00033970 758 01cb29a758005f5e C:\\OSGeo4W\\apps\\qgis-unstable\\bin\\qgis.exe C:\\Windows\\SysWOW64\\ tdll.dll df53e7b3-959a-11df-8898-e9b5efc0ff1d</pre>

Need more infos.

When you say contour, do you mean the contour tool into the Raster menu (GdalTools plugin)?

Did you try if the error occurs with different CVSs?

#2 - 2010-07-25 01:36 AM - Giovanni Manghi

Right, if it is about the "contour" tool in the raster menu is a problem to be discussed here, if you refer to the "contour" plugin it is 3rd party plugin, so you'll need to write in the developer ML and/or contact the author.

#3 - 2010-07-25 06:09 AM - mskele -

Ah. It's the plugin. I'll move on, then.
