Q 01: Installer for WX (recent version)

do you mean installer for windows? If yes, standalone or osgeo4w?

Q 01: Installer for WX (recent version)

do you mean installer for windows? If yes, standalone or osgeo4w?

Windows
Standalone Installer

(Recommended for new users) The standalone windows installer is also based on the OSGeo4W packages and includes GRASS. ECW & [[MrSID]] support is not included.

Download QGIS 1.5.0

#6 - 2010-08-01 08:16 AM - geohq -

Do you mean I have to instal this one:

OSGeo4W Installer

Download OSGEO4W

AND

How to deinstal Q-Gis

#7 - 2010-08-02 09:29 AM - Giovanni Manghi

did you tested the osgeo4w installer or solved in any other way?

Do you mean I have to instal this one:

OSGeo4W Installer

Download OSGEO4W

AND

How to deinstal Q-Gis

#8 - 2010-08-13 05:38 AM - Gerhard Spieles

Hello,
i had the same problem on my win vista system.
Renaming the libtiff.dll in the "system32" folder (p.e. in libtiff_before_qgis_1_5_install.dll) solved the problem and qgis starts now properly.

Gerhard

#9 - 2011-03-02 07:53 AM - Paolo Cavallini

- Resolution set to fixed
- Status changed from Open to Closed

Please check again with a fresh installer and reopen if necessary
