QGIS Application - Bug report #2922
SSL-Connection to PostgreSQL does not work

2010-08-02 03:19 AM - chbr -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	Build/Install		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	invalid
Crashes QGIS or corrupts data:		**Copied to github as #:**	12982

Description

Trying to connect to [[PostgreSQL]] with "SSL Required" does not work. This error message occurs: sslmode value "require" invalid when SSL support is not compiled in

In the 1.4 standalone version everything was fine.

History

#1 - 2010-08-02 05:14 AM - chbr -

Sorry, it's a duplicate from this: http://trac.osgeo.org/osgeo4w/ticket/172

#2 - 2010-08-02 06:08 AM - Giovanni Manghi

I believe that the right place for this problem is the QGIS trac, not the osgeo4w one.

#3 - 2010-08-11 04:47 AM - Jürgen Fischer

- Resolution set to invalid

- Status changed from Open to Closed

Right.   Not a QGIS bug.
