

QGIS Application - Bug report #2934

Doubloon error in qgswwmsprovider.cpp's text string

2010-08-10 10:53 AM - Jean-Roc Morreale

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GUI	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 12994
Description		
This string calls the same expression %4 for two different things, a column number and the display of an error. Based on similar error messages in this file, I think at least one should be different. <pre>mError = tr("Could not get WMS Service Exception at %1: %2 at line %3 column %4\ \ Response was:\ \ %4")</pre>
