QGIS Application - Feature request #2953
Missing layers not picked up in a folder where another missing layer is located

2010-08-19 02:33 AM - infobleep -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	Project Loading/Saving		
Pull Request or Patch supplied:		**Resolution:**	fixed
Easy fix?:	No	**Copied to github as #:**	13013

Description

Sometimes layers may change folders. When this happens each layer has to be located. It would be extremly helpfull though if when locating one layer in a folder, all other layers in that folder were also located. This would save anything to do each layer seperatly.

History

#1 - 2011-04-19 01:34 PM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

bad layers are now handled in a list (see commit:c2e94506 (SVN r15354))
