QGIS Application - Bug report #2966
QGIS crashes when in Mapserver Export

2010-08-24 01:12 AM - richwhite -

Status:	Closed		
Priority:	Low		
Assignee:	Borys Jurgiel		
Category:	Python plugins		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	duplicate
Crashes QGIS or corrupts data:		**Copied to github as #:**	13026

Description

When using [[MapServer]] Export, a project needs to be created.

If the project isn't already created when the [[MapServer]] plugin is started, it prompts the user to save the current project. When the project location and name are chosen and Ok is clicked, QGIS reports a problem and informs the user that it needs to close.

This occurs regardless of the data source, shapefile, postgis database etc.

This doesn't occur if the project is saved before using the [[MapServer]] Export plugin.
