not replicable here under windows xp sp3 and Seven.

Can you provide the custom CRS and a sample dataset?

### #2 - 2010-09-03 04:28 AM - pinghanling -

Replying to [comment:1 lutra]:

*not replicable here under windows xp sp3 and Seven.*

*Can you provide the custom CRS and a sample dataset?*

Am trying to send email, but getting an error:

Delivery to the following recipient failed permanently:

[trac@osgeo.org](mailto:trac@osgeo.org)

Technical details of permanent failure:

Google tried to deliver your message, but it was rejected by the recipient domain. We recommend contacting the other email provider for further information about the cause of this error. The error that the other server returned was: 550 550 <[trac@osgeo.org](mailto:trac@osgeo.org)>: Recipient address rejected: User unknown in local recipient table (state 14).

### #3 - 2010-09-03 04:30 AM - Giovanni Manghi

what you are trying to do? you can attach files here in the tracker.

### #4 - 2010-09-03 04:36 AM - pinghanling -

Replying to [comment:4 lutra]:

*what you are trying to do? you can attach files here in the tracker.*

Sorry, didn't see that. Have attached a shapfile with which I repeatedly got this error.

Custom CRS was:

+proj=tmmerc +lat\_0=0 +lon\_0=29 +k=1 +x\_0=0 +y\_0=0 +ellps=WGS84 +units=m +no\_defs

### #5 - 2010-09-03 08:18 AM - Giovanni Manghi

does not crash under xp sp3 and Seven. Please try update your windows xp installation and/or make a clean installation of qgis (delete also the .qgis folder).

#6 - 2010-09-06 05:55 AM - pinghanling -

Replying to [comment:6 lutra]:

does not crash under xp sp3 and Seven. Please try update your windows xp installation and/or make a clean installation of qgis (delete also the .qgis folder).

Sorry, can't upgrade to SP3. Did a clean installation of QGIS but the problem remains.

We can remove this bug report, but I don't know how.

#7 - 2010-09-06 05:56 AM - pinghanling -

- Status changed from Open to Closed
- Resolution set to invalid

O, I see where to change the status, have changed it to 'invalid'.

#8 - 2010-09-14 04:25 AM - pinghanling -

If it's of any interest, I experienced exactly the same problem yesterday on QGIS 1.5.0 on Ubuntu 10.04.
