<b>Description</b>		
<p>When uninstalling the standalone exe for 1.5.0, the software leaves the shortcut on the desktop. As it is useless without QGIS it should be removed.</p> <p>The user should also have the option to uninstall the OSGEO4W folder and the .qgis folder.</p> <p>This way QGIS leave a clean system behind it and make it easier to make a fresh install.</p>
