

QGIS Application - Bug report #2986

Opening a project file from a plugin crashes QGIS

2010-09-07 02:30 AM - peppo -

Status:	Closed	
Priority:	Low	
Assignee:	Borys Jurgiel	
Category:	Python plugins	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13046
Description		
<p>When I try to open a project file from a plugin QGIS crashes. I use a valid Project file, which loads normally through the GUI.</p> <p>Here is some code:</p> <pre>self.iface.addProject(qstrPath)</pre> <p>also I tried:</p> <pre>self.iface.newProject() qFileInfo = [[QtCore]].QFileInfo(qstrPath) [[QgsProject]].instance().read(qFileInfo)</pre> <p>QGIS starts loading the layers, but before finishing QGIS 1.5 crashes on Windows.</p>

Is it still valid?

| Is it still valid?

Well, it did not work in version 1.5. I did not try any nightly builds.

So I guess, the bug report is valid. I would be happy, if you could fix it or tell me what i did wrong with the `iface.addProject(qstrPath)` function call.

cheers Peppo

#3 - 2010-11-12 12:37 AM - Volker Fröhlich

Works for me on QGIS 1.6 on Linux.

#4 - 2010-11-13 01:54 PM - Martin Dobias

- Resolution set to fixed

- Status changed from Open to Closed

This kind of crash has been fixed recently (in commit:752bad8d (SVN r14435))
