QGIS Application - Feature request #2992
"file name" widget, QGIS on Windows hosts & actions

2010-09-12 05:54 AM - Giovanni Manghi

Status:	Closed		
Priority:	Low		
Assignee:	Jürgen Fischer

Pull Request or Patch supplied:		**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	13052

Description

When using the "file name" widget on Windows hosts QGIS always uses the "/" as symbol in paths, both for files in the file system and files in network shares.

While for files in the file system does not seems to make any difference for actions (the same happens for the network shares mapped has disk drive.), for files in network shares the result is that the actions does not work.
