| Category: | Vectors | | | |
| Affected QGIS version: | | Regression?: | No | |
| Operating System: Linux | | Easy fix?: | No | |
| Pull Request or Patch supplied: | | Resolution: | fixed | |
| Crashes QGIS or corrupts data: | | Copied to github as #: 10361 | | |
| Description | | | | |

See the attached screendump. The derived attribute is sorted in alphabetical order like all the "real" attributes are. This is wrong - it should be put at top, and easy to distinct by color or font.

Or perhaps at the bottom? It really depends on one's view of the importance of the length/area values.

#2 - 2006-09-30 04:46 PM - anonymous -

Whatever, just don't mix derived attributes with attributes that are stored in the attribute table. Keep them clearly separate.

#3 - 2006-10-04 01:28 AM - Gavin Macaulay -

- Resolution set to fixed

- Status changed from Open to Closed

Fixed in svn commit:b9083f3c (SVN r5912).
