

QGIS Application - Bug report #3022

vertex markers disappear when clicking the "save edits" icon plus a more serious issue

2010-09-19 04:21 AM - Giovanni Manghi

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Digitising	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13082
Description		
<p>Pick a vector, toggle editing, make a change (like moving a feature) and then click "save edits", the vertex markers will disappear.</p> <p>If you make this test with the "node tool", for example moving a node, the resulting effect is even worst:</p> <p>select a line or a polygon with the "node tools", move a vertex and click "save edits". The vertex markers will disappear.</p> <p>Now move again a vertex: the blue square will move, but the adjacent lines will not (at this point you can try save edits but it will be as the vertex wasn't moved).</p> <p>This happens only the first time you try move a vertex, because if you try again the tool will work fine.</p> <p>Tested with trunk under both linux and windows.</p>
