Looks like your compiler is crashing. Try a clean build (perhaps with cleaning your ccache).

#3 - 2010-09-21 12:38 PM - William Kyngesburye

I think there have been problems in the past with Qgis compilation (from cmake configuration) and ccache. Try disabling (if possible) or uninstalling ccache.

- *Resolution set to invalid*
- *Status changed from Open to Closed*

Another invalid. Thanks for the ccache advice. I cleared the cache and updated to latest ccache. All seems well now.
