Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10363	

Description

Using SPIT in a fresh installation of Quantum GIS 0.7.4, I am getting a "Problem inserting features from file:" & my shape file path.

I am just filling the form with the path to my multipolygon shapefile, which type is well detected by SPIT before processing, the SRID is not detected, even I have the proper .prj along with my shapefile, so I introduce it; SRID 4326,
By default public global schema and the_geom as geometry column name. Te connection is being made with postgres user.

History

#1 - 2006-10-14 03:05 PM - Gavin Macaulay -

- Resolution set to duplicate

- Status changed from Open to Closed

This is probably the same problem as for ticket #186.
