

QGIS Application - Bug report #3057

Attribute Index out of sync with data source when datasource was modified outside of QGIS

2010-09-28 03:09 AM - Andreas Neumann

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Project Loading/Saving	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13117
Description		
<p>If a data source (in my case a Postgis table) is present in a QGIS project - and the data structure was modified outside QGIS (e.g. in pgAdmin), the attribute index (for aliases, edit types, etc.) gets out of sync.</p> <p>There should either be:</p> <ul style="list-style-type: none">- automatic detection of changes in datastructure- or a manual re-read of the data-structure with a button in the layer properties

History

#1 - 2010-10-15 04:45 AM - Andreas Neumann

It appears that attributes get reread correctly, but the aliases can get out of sync. I may need to do more investigations to see if this also happens with newer projects or if it is a migration issue from older versions.

#2 - 2011-04-09 01:38 PM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:fb438557 (SVN r15688).
