Replying to [lutra](#):

*It seems that the r.reclass command has changed. Now it doesn't produce anymore a output map but just save a "reclass table"*

[http://grass.fbk.eu/gdp/html\\_grass64/r.reclass.html](http://grass.fbk.eu/gdp/html_grass64/r.reclass.html)

Nothing has changed. It's been always this way.

*this means that the base map cannot be deleted with g.remove unless forcing the operation (-f).*

*In fact the GRASS shell will return something like*

```
> GRASS_INFO_WARNING(4733,1): [DTM@curso_manha] is a base map. Remove reclassified map first:
> exposicao_reclass@curso_manha
```

*when trying to delete a base map in the GRASS plugin browser, the warning is not caught and no message is given to the user.*

1/2

But does it remove the base map?
