

QGIS Application - Feature request #3095

Gdal-tools: create virtual catalog with recurse scan of dirs

2010-10-08 04:42 AM - aperi2007 -

Status:	Closed	
Priority:	Low	
Assignee:	Giuseppe Sucameli	
Category:	Python plugins	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 13155
Description		
Actually to create a virtual catalog (vrt) is needed to select one by one all the rasters. Would be a nice enhancement add to the plugin the capabilities to add automatically all the raster of a specific extension founded scanning recursively all the dirs from a starting path.
