

## QGIS Application - Bug report #3119

### actions not working if local OS is not "en" and "override system locale" (to en\_US) is disabled

2010-10-16 05:34 AM - Giovanni Manghi

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	Jürgen Fischer	
<b>Category:</b>	Vectors	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>	All	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 13179
<b>Description</b>		
take an OS not in english, and install QGIS localized as the OS.		
Actions will not work, as the value of the %column variable is not translated to an actual value.		
Enter the QGIS options and "override system locale" to en_US, actions will start to work.		
Tested on qgis 1.5 on windows, but should be true also under linux.		

#### History

##### #1 - 2010-10-16 07:20 AM - Jürgen Fischer

no reproducible with trunk.

Although I noticed that %column is case-sensitive and the attribute of my test shape were uppercase. I must have played with actions on postgres before. Which datasource did you use?

##### #2 - 2010-10-16 09:01 AM - Giovanni Manghi

It is reproducible at least with qgis installed on windows in portuguese. We used shapefiles, regardless the column name is uppercase or lowercase.

Tested both 1.5 and trunk.

##### #3 - 2011-04-17 02:05 AM - Alexander Bruy

Can't reproduce with commit:d7d7caf4 (SVN r15750) on Linux and Windows (both with Russian locale)

##### #4 - 2011-04-21 05:06 AM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Open to Closed

it seems to work now, so closing. Tested on Windows qgis trunk/osgeo4w.
