QGIS Application - Bug report #3143

New Label Engine: ony integer values allowed for font-size in map units

2010-10-21 03:19 AM - Andreas Neumann

Status:ClosedPriority:LowAssignee:nobody -Category:Symbology

Affected QGIS version:

Operating System: All

Pull Request or Patch supplied:

Crashes QGIS or corrupts data:

Regression?: No

Resolution: fixed

Copied to github as #: 13203

Description

In the new label engine one can choose between font-size in points or in map units. For font-sizes in map units it is necessary to permit non-integer numeric values, because depending on the units, the granularity of integer-based font-sizes is not good enough. Currently everything is rounded to the next integer value.

History

#1 - 2010-10-29 05:39 AM - Marco Hugentobler

- Resolution set to fixed
- Status changed from Open to Closed

Fixed in commit:030f658c (SVN r14447)

#2 - 2010-11-01 01:09 AM - Andreas Neumann

can confirm that it works now - thanks a lot!
