

QGIS Application - Feature request #3151

Enable "Source SRS" when SRS available

2010-10-25 02:02 AM - Alexander Bruy

Status:	Closed	Resolution: fixed Copied to github as #: 13211
Priority:	Low	
Assignee:	Giuseppe Sucameli	
Category:	Python plugins	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>When raster is georeferenced it's SRS displayed in "Source SRS" field of the [[GdalTools]] Warp dialog. But by default this option is disabled. This is a it's a little inconvenient.</p> <p>Proposed patch makes this option enabled by default when information about raster CRS is available</p>		

History

#1 - 2010-10-29 12:31 PM - Giuseppe Sucameli

- Status changed from Open to In Progress

The new patch gets the crs using the [[GdalTools]]_utils' related function.

Some layers have a CRS that QGis doesn't manage without creating an "User defined CRS", in this case the QGis epsg() function return 0.

I saw that there's the same issue also in translate tool retrieving the target CRS, so I'm going to fix it.

#2 - 2010-10-29 03:10 PM - Giuseppe Sucameli

- Resolution set to fixed

- Status changed from In Progress to Closed

fixed from commit:6253fb72 (SVN r14451)
