grass plugin: avoid garbled japanese/cyrillic chars in the tools' GUI (fix #4547, #3164)

Thanks Minoru Akagi for patches!

#### History

#1 - 2011-03-02 08:06 AM - Paolo Cavallini

I think this is related to cyrillic characters. Please chack again with a recent version from trunk, as this should have been fixed.

Bug still present at commit:95af577b (SVN r15307).

I suspect that the v.in.ogr GRASS message catalogue (po file) is in a different encoding that QGIS understands. Note that GRASS po files come (naturally) in different encodings. It is important to set the right encoding in QGIS before displaying the GRASS generated messages.

It's good to handle output text encoding of GRASS modules as "System" encoding, I suppose.

**#9 - 2012-11-01 05:55 PM - Paolo Cavallini**

May be duplicated in #4547. Please note: patch attached to #4547
