

## QGIS Application - Bug report #320

### add text layer: field selection

2006-09-30 12:51 AM - Redmine Admin

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	Tim Sutton	
<b>Category:</b>	C++ Plugins	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>	All	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 10379
<b>Description</b>		
<p>When pressing "parse", the plugin repalce x and y fields with the first column name. A better behaviour would be to take as a default x X,y Y values, but in any case the present behaviour does not seem appropriate.</p>		

#### History

- *Resolution set to fixed*
- *Status changed from Open to Closed*

Fixed in SVN commit:d01a0026 (SVN r5897). Will look for lat/lon and x/y column names and use them for the default positions of the field combo boxes.
