Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 13280
Description		
<p>This patch does two things.</p> <p>1. if adding a new layer, the snapping options will default to the values that are set in the general qgis options. Thats what's new.</p> <p>2. When restoring a saved project the 'snap to' that was saved in the project file wasn't restored. The patch corrects this. And that's was was broken. :-)</p>
