

QGIS Application - Feature request #3232

Apply button and problem with not shown layers in snapping options

2010-11-18 07:49 AM - cmoe -

Status:	Closed	
Priority:	Low	
Assignee:	Jürgen Fischer	
Category:	Digitising	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 13292
Description		
Again this patch does to things:		
1) Add an apply button if the snapping options are in non-docking mode (as requested by timlinux)		
2) resolves a problem with layers that are not shown in the canvas: So we don't rely on the canvas but on the mapLayerRegistry. Also needed a new signal, as the layerWillBeRemoved signal fires to early.		

History

#1 - 2010-11-19 05:15 AM - cmoe -

The second version should do same thing as mentioned for the first version. This version (should) work without the introduction of a new signal.

#2 - 2010-11-28 09:23 AM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

applied in commit:44263084 (SVN r14778)
